SEKH ARIF HOSSAIN

Full-Stack Developer

Kolkata, West Bengal, India | 7479085053 | skarifh09@gmail.com | github.com/skarifh09

PROFILE

Full-Stack Developer with years of experience designing and delivering scalable web applications using React.js, Node.js, Express.js, and Java Spring Boot. Proven track record across frontend engineering, e-commerce platform development, RESTful API design, and MongoDB/SQL database architecture, with additional hands-on experience in real-time application development (Stream Chat/Video API) and Docker containerization. IBM Full Stack Software Developer Certified (Coursera), with practical exposure to cloud operations, CI/CD, and API security. Seeking to bring strong problem-solving ability, cross-functional collaboration, and full software development lifecycle experience to a growth-focused engineering team.

PROFESSIONAL EXPERIENCE

Frontend Developer | Karma Projects *Jan 2026 – August 2026· Kolkata, India*

- Designed and developed multiple responsive websites, including e-commerce platforms, using HTML5, CSS3, JavaScript, and React.js, delivering polished, user-friendly interfaces across devices.
- Built and integrated backend functionality using Java, PHP, and Node.js, working with relational databases to support dynamic content, product catalogs, and transactional workflows.
- Collaborated with clients and cross-functional teams to translate business and branding requirements into functional UI/UX designs, from wireframe to deployment.
- Managed source control and collaborative development workflows using GitHub, maintaining clean version history and supporting code review practices.
- Contributed to end-to-end delivery of client projects, balancing frontend architecture, database integration, and performance optimization.

Frontend Developer | Paperkrft Solutions *May 2025 – Jan 2026 · Kolkata, India*

- Designed and developed multiple responsive websites, including e-commerce platforms, using HTML5, CSS3, JavaScript, and React.js, delivering polished, user-friendly interfaces across devices.
- Delivered end-to-end web solutions using Node.js, Express.js, React.js, Python, Java Spring Boot, and PHP.
- Designed and managed SQL and MongoDB databases for scalable, high-performance data handling.
- Applied Docker containerization to standardise development environments and streamline deployment workflows.
- Maintained consistent technical quality and delivery standards across client projects.

Software Developer | Busybox Technology Private Limited *Aug 2023 – Apr 2025 · Kolkata, India*

- Built responsive, reusable UI components with React.js and JavaScript (ES6+), ensuring cross-browser compatibility and improved code maintainability.
- Integrated RESTful APIs with Java Spring Boot services to enable seamless client-server data exchange.
- Gathered and analyzed client requirements to customize UI/UX features aligned with business goals and branding.
- Participated in sprint planning, daily stand-ups, and code reviews, contributing to bug fixes and performance improvements within an Agile team.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, Python, PHP, SQL

Frontend: React.js, HTML5, CSS3, Responsive Web Design, UI/UX Implementation

Backend: Node.js, Express.js, Java Spring Boot, RESTful API Design

Databases: MongoDB, MySQL, SQL, SQLite, H2

DevOps & Tools: Docker, Git, GitHub, CI/CD Pipelines

Real-Time & Cloud: Stream Chat/Video API, JWT Authentication, Cloudinary

Certifications: IBM Full Stack Software Developer (Coursera) — Cloud Operations, CI/CD, API Architecture & Security

PROJECTS

Real-Time Video & Text Chat Application — MERN Stack, Stream API, Cloudinary

Built a full-stack real-time communication platform using the MERN stack (MongoDB, Express.js, React.js, Node.js), integrating Stream's Chat and Video APIs to power real-time messaging and peer-to-peer video calling. Designed the platform to connect users globally for language exchange, enabling real-time text and video practice. Implemented JWT authentication and Cloudinary-based media storage, and built a responsive React interface with typing indicators, read receipts, and group chats. Deployed on Render.

React Admin Dashboard — React.js, REST APIs

Designed and developed an Inventory Management System with role-based login using React.js. Built an intuitive admin dashboard with reusable components and integrated multiple APIs for dynamic customer data viewing and registration, ensuring secure access control and efficient inventory tracking.

Java-Based Backend Systems — Banking Application & Battleship Game

Developed a Banking Application using Java Spring Boot and REST APIs to handle transactions, account management, and authentication. Built a Battleship Game applying object-oriented programming principles, modular class design, and gameplay logic demonstrating strong backend development and API integration skills.

Brewmio E-commerce Website — HTML, CSS, JavaScript, PHP, SQL

Developed a full e-commerce website with HTML, CSS, and JavaScript on the frontend and PHP/SQL for backend integration, including Web3Forms for form submission and email data handling.

Module Management System — Java Spring Boot, H2 Database

Built a CRUD-based Module Management System using Spring Boot and Java with an H2 in-memory database, exposing RESTful APIs for the full create-read-update-delete lifecycle — a lightweight solution for testing and development.

Home Application Store — Java, Node.js, SQLite

Developed a web-based application store using Java and SQLite for backend data management, with Node.js handling server-side operations and a HTML/CSS/JavaScript frontend for browsing and managing app listings.

EDUCATION

B.Tech in Computer Science and Technology — CGPA 9.0
Maulana Abul Kalam Azad University of Technology, Kolkata | 2019 – 2023

Secondary Examination: (10th) — 78.57%
Bawali High School, Kolkata | 2016 – 2017

Higher Secondary (12th) — 75.80%
Bawali High School, Kolkata | 2017 – 2019

CERTIFICATIONS & COURSES

- IBM Full Stack Software Developer Professional Certificate — Coursera: coursework covering React Development, Object-Oriented Backend Architecture, Git & Version Control, CI/CD & Deployment, Cloud Operations & Security, and RESTful API Architecture.
- Successfully completed 90 Days of Data Structure Tutorial Series.
